

## Psychic Readings

### READING WITH A DIFFERENCE

I am sure that you all agree that the power and support from spirit is such an amazing benefit to us all, thousands upon thousands of people take their strength from spirit over the phone and on face to face readings every day, but how would that be if those amazing abilities that our psychic readers had were to go one step further in doing the work of REAL Transformation, well one such reader is doing this and teaching others to do the same.

Louise Van der Velde, a regular face on our TV screens, this Relationship Transformer and now Love Doctor of GMTV is offering her clients the chance of a reading with this difference. Louise has married her psychic gifts and abilities to clearly connect every person to their higher self with Transformational tools, of energy movement and modern psychotherapy to really take her readings to a new level.

Louise uses fast, easy to learn methods to completely transform limiting beliefs and negative emotions in moments. Finally clients stuck in the same old patterns can break free using powerful visualisation change techniques and connection to spirit. Louise downloads information to the client, but then she goes one step further, SHE BLOWS OUT THEIR EMOTIONS AND LIMITING BELIEFS FOREVER. One client Louise dealt with was caught up in her patterns of negative relationships and was unable to break free. This girl was so insecure and became paranoid that her boyfriend was cheating on her; she literally called psychics every day checking his whereabouts. With a little digging it was discovered, this belief that actually stemmed from a perceived lack of love as a child, was the root cause.

Louise travelled the client back in time, using a simple script; she not only cleared this belief of "everybody leaves me" and "no one loves me" but also actually replaced deep in the unconscious, where all lasting change must be made, a new more positive belief. Sure enough the client stopped recreating the patterns, within six months she found what she described as her dream man, knowing that this man would never leave, she now stands a real chance of lasting love. These life-changing techniques took literally 15 minutes to perform. She still calls for clairvoyance and has since cleared her anger and grief along with the belief that she will never have much money, and finally she is another happy client.

Louise is running two days certification courses in "The Transformation". The courses will be running for any therapist or person who wants to learn these amazing fast change lasting techniques (which have their base in NLP Neuro Linguistic Programming) Louise said "These tools really give people the cutting edge so through real transformation of individuals we will begin to see the transformation we all want to see in the world."
